

A CONSCIOUS ECONOMIC ALTERNATIVE

PROMOTING SUSTAINABLE FARMING AND CONSCIOUS TRADING

EcoPeace© is a sustainable socio-economic movement and enterprise created in 2006 by Sheikh Aly N'Daw, head of International Sufi School, after the acquisition of 10 hectares of land in the village of Bayouf Pout, Senegal.

As an economic alternative, EcoPeace places the human being at the centre of all its initiatives and promotes the universal principle of «wishing onto others what we would wish onto ourselves». This principle permeates through all the stages of farming, production and trading, from the local peasants who process the products by hand, to our customers in Senegal and around Europe, whom we meet directly on the local markets.

QUALITY FOR ALL

Six years into the project, EcoPeace keeps working with the local peasant farmers, mostly women and youngsters, to develop its horticultural production which comprises of a wide range of 100% naturally-grown vegetables and exotic fruits, especially mangoes. Through our ongoing "Quality for All" campaign, our aim has been to awaken the consciousness of the local population as to the benefits of our quality natural products for their own health and well-being.

Our largest production is mangoes (15-20 tons per harvest), which have recently been certified organic by Global Gap (Netherlands). In 2012, we exported 2.5 tons to France and the UK. Following this successful first experience, we now plan to export between 10 to 13 tons this year.

We also have a fruit and vegetable processing unit on the farm, where we produce beverages, cordials, pickles and jams. We now produce our own exclusive range of premium herbal teas and dietary supplements, with traditional plants and fruits from Senegal.

OUR FUTURE PROJECTS

- Production of honey
- Production of dried fruits
- Cultivation of spirulina and other medicinal plants
- Setting-up a laboratory for herbal therapy

AVAILABLE TO ORDER THIS SEASON

- Herbal teas and dietary supplements
- Organic mangoes of the Kent, Smith and Baguinda varieties (from July 2013)
